SUMMARY

I build the systems a business runs on, from the books and the schedule to the website and the product. Founder of MiCar, a car-ownership platform with a live valuation engine fitted to 1,925 real listings. Eight years across accounting, project management, AutoCAD drafting and collision repair. Author of seven AI-assisted books (about 147,000 words) on business and philosophy.

EXPERIENCE

Founder & Independent Builder · MiCar & client systems — Mar 2026 – Present

- **MiCar:** built **Nexus Valuation** (live), a used-car calculator giving trade-in, private-party and dealer prices with a 5-year forecast. Ships dealer window sheets with QR codes, in English and Spanish.
- Sourced official MSRPs, EPA model data and a weekly BLS price index; fitted the depreciation curve to 1,925 real listings across 56 models at **8.0% mean error**, guarded by 102 automated tests.
- Finished **MiCar Tuner**, a playable driving prototype (tire physics, six race types, garage and dyno); now refining it into the engine of **MiCar World**, a multiplayer 3D dealership trainer.
- **Recast Studio:** rebuilt 16 published landing-page designs from scratch with original code, WebGL and three.js; 14 live demos, English and Spanish.
- **Small-business template (since Oct 2026):** turned the operating system I built for **MKG Services** (website, booking calendar, client accounts, admin and timeclock; books, pricing, scheduling, growth plans, a bilingual service agreement and owner's guide) into a reusable template, now rolling out to **J&D Enterprise Home Solutions** (books built from a bank-statement analysis) and **C&W Masonry**.

Accounting & Operations · Queen City Auto Deals & Repairs — Jan 2020 – Present

- Keep the books in QuickBooks for a used-car dealer and repair shop; drive sales through SEO and online listings.
- Prep and refinish vehicles; completed a full collision repair and repaint of a 2015 Dodge Charger (bumpers, dents, rear quarter panel).

Project Manager & AutoCAD Drafter · Carolina Pools — Mar 2023 – May 2025

- Promoted from assistant manager; ran commercial pool builds end to end, including chemical treatment and heavy equipment.
- Drafted permit sets in AutoCAD for DR Horton, largest a **12-sheet set for a 219,493-gallon public pool** (Tap Root Farms, NC): 8,456 sq ft of water, 563-bather load, 708 GPM filtration.
- Also drafted Adams Glen (61,700 gal, SC DHEC 61-51) and the Wildbrook Village entrance monument (2018 NC Building Code).

Front-End Apprentice & Marketing Intern · Red Ventures — Jun 2018 – Jul 2021

- Paid apprenticeship in HTML, CSS and JavaScript; digital marketing internship.

EDUCATION

Belmont Abbey College
B.A., Business Administration
Concentration in Accounting
Belmont, NC · 2022

BY THE NUMBERS

219,493 gallons in the largest pool I drafted

1,925 real listings behind MiCar's prices

8.0% average valuation error

7 books written in 2026, with AI

SKILLS

Business operations
QuickBooks, bookkeeping, bank-statement analysis, SOPs, scheduling, project management, SEO

Product & data
Pricing models, data sourcing and calibration, testing, Google Sheets

Web
HTML, CSS, JavaScript, React, TypeScript, WebGL, Firebase, GitHub Pages

3D, drafting & video
AutoCAD, Blender, Three.js, video editing, motion graphics

Field
Pool construction, heavy equipment, auto body and refinish
